SUPERBOWL

THE NEWEST MEMBER OF THE WINNING TEAM AT GREYHOUND

Greyhound Electronics, Inc has now applied all of the technology of its floor units into a swivel mounted table or counter-top model that gives you, the operator, the capability to update your game as new games become available.

This "game changing" feature incorporates a satellite board which holds the game ROM's. To change games just replace any game chip or the complete satellite board.

And now Greyhound Electronics introduces Superbowl, a game of skill and chance in which the player tries to form a winning pattern of football players and cheerleaders by discarding undesirables and drawing replacements.

Superbowl, the newest member of a winning selection of games from Greyhound, comes in both handsomely crafted floor and convenient counter-top models. Each incorporating the state-of the-art technology which you have come to expect from Greyhound.

A color monitor that displays graphics in fine detail and vibrant colors makes each and every game come alive on the screen.

So if you're looking to turn the tables on declining profits ... turn to GEI. Amusement games for fun and entertainment only.

Oversized rear access cash draw. Holds up to $1000 in quarters.

Neutral density acrylic shield to enhance and protect the picture tube.

Specially designed 13-inch Wells-Gardner monitor for superior color graphics.

"Action Entry" coin entry and return positioned on the front of the unit for easy access.

High-Impact ABS Royalite case for long-life and durability.

Side shrouds protect screen from ambient light or light distortions.

Height: 17 7/8"
Width: 20 3/4"
Depth: 20 7/8"

Baked-on textured epoxy finger board plate eliminates finger prints and insures durability.

Buttons are keyed into the panel which guarantees horizontal alignment in one straight line.

Wide turntable base for player comfort.

Completely shielded power supply to eliminate on screen distortion.
